      total_routes
    },
    // ...
  ]
}
```

Get full plan

Request:

GET /plans/:id

Response:

```
{
  routes: [
    {
      vehicle: {
        id,
        name,
        capacity,
        instances
      },
      waypoints: [
        {
          id,
          client: {
            id,
            name,
            address,
            lat,
            lng,
            time_window_start,
            time_window_end
          }
        },
        orders: [
          {
            id,
            product: {
              id,
              name,
              unit_weight,
              amount_available
            },
            amount_requested
          },
